

LEED®

The **LEED® green building program** is the preeminent program for the design, construction, maintenance and operations of high performance green buildings. Learn more at usgbc.org/LEED. Many of Kährs products contribute to **LEED (Leadership in Energy and Environmental Design) points** on construction projects.

Building Design and Construction

MR | Building Product Disclosure: Environmental Product Declarations

EPDs: Please check with your representative

MR | Building Product Disclosure and Optimization: Sourcing of Raw Material

Third-party verified corporate sustainability reports (CSR), which include environmental impacts of extraction operations and activities associated with the manufacturer’s product and the product’s supply chain, are valued as one whole product for credit achievement calculation.

Kährs audited EU EMAS-Sustainability Report

Wood products must be certified by the Forest Stewardship Council® or USGBC-approved equivalent. Products meeting wood products criteria are valued at 100% of their cost for the purposes of credit achievement calculation.

This credit contains two options, with the second focused on “leadership extraction practices.” To receive the credit, a project must use “at least 25%, by cost, of the total value of permanently installed building products.” For wood products, the credit requires products “certified by the Forest Stewardship Council® or USGBC-approved equivalent.”

Kährs offers FSC® certified products upon request.

Building Product Disclosure: Material Ingredients

FloorScore® Certification: Kährs Avanti, Kährs Canvas, Kährs Life, Kährs Linnea, Kährs Original

IEQ | Low-Emitting Materials

Flooring - At least 90% of all flooring, by cost or surface area, must meet the VOC emissions evaluation or inherently non-emitting sources criteria.

NAUF: available special order, certain restrictions apply

ULEF: all products meet ULEF emission standards

FloorScore® certified flooring products contribute to Low Emitting Material credits under the LEED v4 rating systems and other systems such as WELL, BREEAM, Green Globes, Collaborative for High Performance Schools (CHPS), California Section 01350, and other sustainable building requirements. Floors holding the FloorScore® logo are certified as contributing to indoor air quality.
